SUMMARY

Full-stack and backend developer with six months of hands-on internship experience designing REST APIs, implementing secure JWT-based role authentication, designing databases, and delivering production-ready websites for live company projects. Strong foundation in Python, JavaScript/TypeScript and Java, with working knowledge of Node.js, NestJS, Next.js, React.js, Django and Spring Boot, backed by PostgreSQL, MongoDB and Redis, and containerized deployment with Docker and Kubernetes. Seeking a Full Stack or Backend Developer role where I can build scalable, secure applications.

EXPERIENCE

Backend Developer Intern — Visionite Tech, Surat, Gujarat
Mar 2026 – Sep 2026 (6 months)

- Designed and built **REST APIs** powering the company's web applications, handling data exchange between frontend clients and backend services.
- Developed a complete **role-based authentication and authorization system (RBAC)** using **JWT**, securing the application and controlling access for different user roles.
- Implemented **API rate limiting** to protect endpoints from abuse and keep services stable under heavy traffic.
- Performed **database design**, including schema modeling and relationships, for application data in SQL and NoSQL databases.
- Delivered **production-ready websites** for live company projects, from backend logic to deployment.
- Implemented **Docker** and **Kubernetes** for containerized deployment and used **Redis** for caching and fast data access.

PROJECTS

Cura — Hospital Service Management System | NestJS | *In Progress*

- Building a **hospital service management system** using **NestJS** to manage hospital services digitally.
- Designing the backend architecture and REST APIs for the platform.

Role-Based Authentication System — Visionite Tech | NestJS

- Built a complete **role-based authentication and authorization system** in **NestJS** for a live company project.
- Implemented **JWT**-based login and role-based access control so each user role can reach only its permitted resources.

Authentication System | Node.js, Express.js

- Built a **user authentication system** using **Express.js** on Node.js.
- Developed secure backend REST endpoints for user authentication.

ShipEase Kids — E-Commerce Toy Store | Python, Django | GitHub

- Built an **e-commerce website for kids' toys** using **Python and the Django framework**.
- Developed the backend and storefront for browsing and selling toy products online.

EDUCATION

B.Tech in Information Technology
Pursuing

Diploma in Information Technology — P P Savani University
Completed

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, C#, PHP, HTML, CSS
Frameworks: Node.js, Express.js, NestJS, React.js, Next.js, Django, Java Spring Boot
Databases: SQL, PostgreSQL, MongoDB, Redis
DevOps & Tools: Docker, Kubernetes
Spoken languages: English, Hindi, Gujarati
